

**Michigan Annual Spring Clean-up is scheduled to start May 19, 2014. A dumpster at the inert landfill will be provided. If the dumpster is filled to capacity, the gates at the landfill will be locked until an empty dumpster arrives to prevent people throwing items next to the dumpster. Please keep in mind that you cannot dispose of tires, chemicals, oil, scrap iron including metal bed frames, bikes, or any other metal objects in the dumpster. Paint can only be disposed of if the lids are removed and the paint is dried. All metal items including appliances can be placed on the trailer parked on the northwest side of the ball diamond. Also please keep in mind we have an inert landfill, inspected by the State Health Department. Please do not dispose anything but trees, branches, grass, and vegetation. People have been disposing of sheetrock, metal, cardboard, trash, cans, and construction lumber. These things are not acceptable. If the State sees these things, they can make the City lock the gates and tell us we can no longer use this inert landfill, so please do not dispose of these items there. If you have any questions, please contact Cathy at the City Office or call 247-3347.**
